This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide a reasonable protection against interference in a residential setting. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause interference to radio communications. If this equipment does cause interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to increase the separation between the equipment and receiver.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
